

SEYCHELLES

ABOUT SEYCHELLES VACCINATIONS

The Republic of Seychelles is situated in the western Indian Ocean just south of the Equator. It consists of a nucleus of several granitic islands, with a large number of outlying coralline islands. The daily temperature of 27°C varies little year-round. The hot, humid season runs from December to May, with March and April the hottest months, although temperatures seldom exceed 31°C. July and August are the coolest months when temperatures drop as low as 21°C. Southeast trade winds blow regularly from May to November and this period is the coolest, driest, and most pleasant part of the year. Rainfall varies considerably from year to year and island to island. The average tends to be 239 cm in Victoria. During the rainy months, the climate is enervating due to the high humidity and constant heat.

OVERALL RISK

Medium Risk - Preventable disease occur sporadically or at moderate levels. Consult a Travelvax clinic for your specific risk if travelling outside resorts, 5 star accommodation or for periods longer than a few days.

MALARIA RISK

No risk to travellers.

VACCINE PREVENTABLE DISEASES

YELLOW FEVER

Country requirement at entry: A yellow fever vaccination certificate is required for travellers aged 1 year or over arriving from countries with risk of yellow fever transmission and for travellers having transited through an airport of a country with risk of yellow fever transmission.

No vaccination certificate is required for direct travel from Australia or New Zealand.

COVID-19

For the most up to date requirements for entry into Australia, go to [Smarttraveller](#).

Please click this [COVID-19 Travel Regulations Map](#) (IATA) to view the latest Seychelles COVID travel requirements.

HEPATITIS A

Low risk.

HEPATITIS B

Moderate presence of Hepatitis B in local population. Vaccination would be recommended.

TYPHOID

Low risk for most travellers. Consult a medical practitioner for your specific risk.

INFLUENZA

Year round risk present. Most common vaccine preventable illness in travellers. Vaccine recommended, effective for 1 year.

RABIES

Disease present. Recommendation for vaccination will depend on specific itinerary and activities planned. Generally rabies vaccination is advised for high risk individuals such as veterinarians or animal handlers, cavers. Additionally for higher risk travellers who plan: extended periods outdoors, rural travel, adventurous activities including bicycling; also expats or long-term travellers to endemic regions and children (risk of more severe or risk-prone bites and may not report contact at all).

JAPANESE ENCEPHALITIS

No risk to travellers.

POLIO

No risk to travellers.

TICKBORNE ENCEPHALITIS

No risk to travellers.

MENINGOCOCCAL MENINGITIS

Low risk to travellers.

CHOLERA

No risk to travellers.

OTHER DISEASES

TRAVELLERS DIARRHOEA

Moderate risk. Travellers' Diarrhoea affects 20-60% of overseas travellers, food and water precautions are essential. Self-treatment medications may be recommended.

INSECT-BORNE DISEASES

Diseases such as [Dengue](#), [Chikungunya](#), [Zika](#) may be present. Seasonal risk will vary by country. Whether preventive measures will be recommended will depend on itinerary, length of stay, type of travel etc. and needs to be discussed with a medical practitioner. For those countries with disease present, risk is highest in urban and semi-urban areas, but may also occur in rural areas; [insect avoidance measures](#) are highly recommended all year round. Travelvax believes that the best defence is to understand their habits, dress properly and use an [effective insect repellent](#) in the correct manner. Consult a medical practitioner for your specific risk.

SCHISTOSOMIASIS

No risk to travellers.

STIs

Low incidence of sexually transmitted and blood-borne diseases. Safe sex and needle precautions should be followed by all travellers.

ALTITUDE

No risk to travellers.

ADDITIONAL INFORMATION

PERSONAL SAFETY

In order to check before and during travel for any high-risk areas visit the Smartraveller website. Avoid unnecessary displays of wealth or valuables and minimise the amounts of cash carried. Keep secure records of passport/credit card/licence numbers. For more safety tips visit: www.smartraveller.gov.au.

MEDICAL CARE

Limited medical facilities available. Unless travelling with a well-equipped organisation, a high level of self-sufficiency in terms of first aid kits and sterile equipment is recommended. An evacuation contingency should be a part of your travel insurance. Check for any contacts supplied by your emergency assistance organisation (nominated by your travel insurer) or with IAMAT (International Association of Medical Assistance for Travellers).

FIRST AID KITS & ACCESSORIES

Carry a basic [first aid kit](#), customised to your activities. For longer stays consider a needle and syringe pack and medication for travellers diarrhoea.
