

ARGENTINA

ABOUT ARGENTINA VACCINATIONS

Bordered by Chile, Bolivia, Paraguay, Brazil and Paraguay, Argentina is South America's second largest country, occupying most of the continent's southern portion between the Andes Mountains and the Atlantic Ocean. Except for the subtropical northern tip, Argentina's mainly temperate climate varies from region to region. In the south, the climate in the Patagonian-Fuegian Steppe region ranges from moderate to cold and dry; further north Monte is also dry but warmer, with no discernable winter; the Pampas region's rainfall ranges from 50cm in the west to 100cm in the east, with cool winters and summer humidity; tropical Chaco in the north has annual rainfall of up to 150cm and summer temperatures to 49c.

OVERALL RISK

Medium Risk - Preventable disease occur sporadically or at moderate levels. Consult a Travelvax clinic for your specific risk if travelling outside resorts, 5 star accommodation or for periods longer than a few days.

MALARIA RISK

Malaria is present, whether or not anti-malarial medications are recommended will need to be discussed with a medical practitioner. Consult a Travelvax clinic for long stays or significant level of outdoor activities.

VACCINE PREVENTABLE DISEASES

YELLOW FEVER

Disease present. Vaccination is recommended for all travellers aged 9 months and over going to Corrientes and Misiones Provinces.

Vaccination generally not recommended⁽¹⁾ for travellers going to Formosa Province and designated areas of Chaco, Jujuy and Salta Provinces.

Not recommended for travellers whose itineraries are limited to areas and provinces not listed above.

⁽¹⁾ Yellow fever vaccination is generally not recommended in areas where there is low potential for exposure to yellow fever virus. However, vaccination might be considered for a small subset of travellers to these areas, who are at increased risk of exposure to yellow fever virus (e.g. prolonged travel, extensive exposure to mosquitoes, inability to avoid mosquito bites). When considering vaccination, any traveller must take into account the risk of being infected with yellow fever virus, country entry requirements, as well as individual risk factors (e.g. age, immune status) for serious vaccine-associated adverse events.

Travelvax note: We advise that this information is discussed with a yellow fever licenced practitioner.

COVID-19

For the most up to date requirements for entry into Australia, go to [Smartraveller](#).

Please click this [COVID-19 Travel Regulations Map](#) (IATA) to view the latest Argentina COVID travel requirements.

HEPATITIS A

Moderate risk to travellers, vaccination recommended.

HEPATITIS B

Low presence of Hepatitis B in local population, discuss whether vaccination would be recommended with a medical practitioner. Vaccination is recommended for specific high-risk travellers (sport/adventure/occupational/sexual). Consult a medical practitioner for your specific risk.

TYPHOID

Moderate risk for most travellers. Vaccination recommended for travel to smaller cities, villages and rural areas outside usual tourist routes. Some medical conditions pre-dispose to infection; whether vaccinations would be recommended should be discussed with a medical practitioner. Consult a medical practitioner for your specific risk.

INFLUENZA

Southern hemisphere winter risk (May to October). Most common vaccine preventable illness in travellers. Vaccine recommended, effective for 1 year.

RABIES

Disease present. Recommendation for vaccination will depend on specific itinerary and activities planned. Generally rabies vaccination is advised for high risk individuals such as veterinarians or animal handlers, cavers. Additionally for higher risk travellers who plan: extended periods outdoors, rural travel, adventurous activities including bicycling; also expats or long-term travellers to endemic regions and children (risk of more severe or risk-prone bites and may not report contact at all).

JAPANESE ENCEPHALITIS

No risk to travellers.

POLIO

No risk to travellers.

TICKBORNE ENCEPHALITIS

No risk to travellers.

MENINGOCOCCAL MENINGITIS

Low risk to travellers.

CHOLERA

No risk to travellers.

OTHER DISEASES

TRAVELLERS DIARRHOEA

Moderate risk. Travellers' Diarrhoea affects 20-60% of overseas travellers, food and water precautions are essential. Self-treatment medications may be recommended.

INSECT-BORNE DISEASES

Diseases such as [Dengue](#), [Chikungunya](#), [Zika](#) may be present. Seasonal risk will vary by country. Whether preventive measures will be recommended will depend on itinerary, length of stay, type of travel etc. and needs to be discussed with a medical practitioner. For those countries with disease present, risk is highest in urban and semi-urban areas, but may also occur in rural areas; [insect avoidance measures](#) are highly recommended all year round. Travelvax believes that the best defence is to understand their habits, dress properly and use an [effective insect repellent](#) in the correct manner. Consult a medical practitioner for your specific risk.

SCHISTOSOMIASIS

No risk to travellers.

STIs

No risk to travellers.

ALTITUDE

Altitude illness is a risk to travellers ascending higher than 2000 meters. Preventative medication is available. Consult a medical practitioner if ascending to 2000 metres or above.

ADDITIONAL INFORMATION

PERSONAL SAFETY

In order to check before and during travel for any high-risk areas visit the Smartraveller website. Avoid unnecessary displays of wealth or valuables and minimise the amounts of cash carried. Keep secure records of passport/credit card/licence numbers. For more safety tips visit: www.smartraveller.gov.au.

MEDICAL CARE

Comprehensive medical facilities accessible throughout the country. Check for any contacts supplied by your emergency assistance organisation (nominated by your travel insurer) or with IAMAT (International Association of Medical Assistance for Travellers).

FIRST AID KITS & ACCESSORIES

Carry a basic [first aid kit](#), customised to your activities. For longer stays consider a needle and syringe pack and medication for travellers diarrhoea.
